Professional Summary

AI/ML Engineer and MCA graduate (Class of 2026) experienced in building end-to-end machine learning pipelines, Retrieval-Augmented Generation (RAG) systems, and full-stack MERN integrations. Skilled in Python, PyTorch, TensorFlow, LangChain, and FastAPI for deploying scalable microservices and validating REST APIs. Proven track record in data preprocessing, vector search indexing, and GPU memory optimization to build reliable, high-performance intelligent software.

Technical Skills & Core Competencies

Core AI & Machine Learning: Supervised & Unsupervised Learning, CNNs, Generative Adversarial Networks (GANs), Transformer Architectures, Retrieval-Augmented Generation (RAG)

Frameworks & Libraries: PyTorch, TensorFlow, Keras, LangChain, Hugging Face, Scikit-learn, PennyLane, Pandas, NumPy

Web Technologies & Full-Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), JavaScript (ES6+), HTML5/CSS3

Model Deployment & APIs: FastAPI, REST API Design, Postman (Endpoint Testing & Assertion), Streamlit, Uvicorn, Docker Basics

Databases & Data Engineering: MySQL, PostgreSQL, Relational Database Design, Vector Embeddings, ETL Automation

Tools & Cloud Platforms: Git, GitHub, Linux/Unix CLI, Bash Scripting, Render, AWS Cloud Foundations

Professional Experience

Gravit InfoSystems Pvt. Ltd.

Gwalior, Madhya Pradesh, India

AI/ML Developer Intern – Full-time

Sep 2026 – Present

- Integrated custom AI/ML model inference endpoints and LLM workflows into a full-stack MERN (MongoDB, Express.js, React, Node.js) web platform.
- Engineered a Retrieval-Augmented Generation (RAG) pipeline leveraging LangChain and vector embeddings to deliver real-time, context-aware query generation.
- Designed, implemented, and validated REST APIs connecting Node.js/Express services with Python microservices, ensuring sub-second latencies and strict JSON schema contracts.
- Conducted comprehensive API testing and endpoint assertions using Postman, validating auth headers, payload edge cases, and asynchronous exception handlers.

Codec Technologies

Remote, India

Python Developer Intern

Aug 2026 – Sep 2026

- Authored modular, production-ready Python backend scripts and automated data workflows, optimizing logic execution for runtime efficiency.
- Constructed optimized SQL queries to audit relational databases, resolving data discrepancies and enforcing structural integrity.
- Implemented unit test suites with parameterized test cases to stress-test boundary conditions and prevent regression bugs.

Key Technical Projects

QGAN Super-Resolution Web Application | Python, PyTorch, PennyLane, FastAPI, MySQL, React

Apr 2026

- Engineered a hybrid quantum-classical GAN utilizing a 5-qubit PennyLane variational quantum generator coupled with a PyTorch classical discriminator for image super-resolution.
- Mitigated GPU memory allocation bottlenecks during hybrid execution by optimizing gradient accumulation and batch sizing during tensor operations.
- Developed asynchronous REST inference APIs using FastAPI to handle model inference requests for satellite and medical image upscaling.

AI Crop Disease Detection System | Python, TensorFlow, CNN, Data Augmentation, Computer Vision

Dec 2025

- Constructed a deep Convolutional Neural Network (CNN) in TensorFlow/Keras achieving 82%+ classification accuracy across multi-class plant leaf datasets.
- Engineered an end-to-end data augmentation and preprocessing pipeline (rotation, zoom, normalization) to eliminate class imbalance and prevent overfitting.
- Packaged the inference engine into a responsive web interface allowing immediate diagnosis from uploaded leaf imagery.

Education

ITM University

Gwalior, M.P.

Master of Computer Applications (MCA) – CGPA: 7.8 / 10.0

Jun 2026

- Relevant Coursework:** Machine Learning, Data Structures & Algorithms, Database Management Systems (DBMS), Python Programming, Cloud Computing

Certifications & Extracurriculars

AWS Academy Graduate: AWS Academy Cloud Foundations

Smart India Hackathon (SIH): National Participant & Certificate of Merit

Languages

Languages: English (Professional Working Proficiency), Hindi (Native)
